Ikernel.exe error

Error Description:

Ikernel.exe error
Error installing
Installation failed due to insufficient memory
Registration failed - not enough ram

Resolution:

This error may occur after a failed install attempt. It can be caused by Internet Explorer being installed and afterwards the install failing or being canceled. The computer must be rebooted and the Internet Explorer install finished, before trying to start the install again. This may require several reboots.

Additional Information:

Computer systems that have marginal hard drive or RAM memory may encounter problems with installing or running the WISC-III/WIAT II Writer. The computer MUST have at least 32 MB RAM, and 75 MB free hard disk space when installing The Psychological Corporation Assessment Center for the first time. The system will need 25 MB of free hard disk space if The Psychological Corporation Assessment Center has been installed with another product.
