

Normative data not available for selected group

Frequently Asked Question:

I am receiving the following message: "Normative data not available for selected group"

Resolution:

Check the examinee birth date, assessment date, and grade in school to ensure they are entered correctly. Failure to enter the required information will generate a normative data error.

You cannot score child and adolescent examinees with the WAIS-III WMS-III WIAT-II Writer software because the program is not normed for that age group.

The WAIS-III WMS-III WIAT-II software only allows users to run reports for this age band:

- WAIS-III: 16-89 years old
- WMS-III: 16-89 years

This product is intended for the older age bands. Should you desire to run reports for children and adolescents, you must purchase the WISC-III WIAT-II Scoring Assistant or Writer or WISC-IV WIAT-II Scoring Assistant or Writer. Please contact Pearson Assessment Customer Service if you wish to order the software for the younger age group. You can reach Customer Service at 1-800-872-1726 or email to customer.service1@pearson.com. You can also order from the Harcourt Assessment web site at www.harcourtassessment.com.
