

# TPC UpdateService, automation error, the system cannot find the file specified

## Error Description:

TPC UpdateService, automation error, the system cannot find the file specified

## Resolution:

This issue may be due to a product with the update service being installed and uninstalled, and an older product being added after. The files for the update service that were removed by the uninstall have not been replaced by the install of the older product.

Please reinstall the software product that was uninstalled to correct the issue. This may occur with WISC-IV Writer, CELF-IV Report Assistant, and newer software.
