Save the data

Frequently Asked Question:

Save the data

Answer:

The Children's Memory Scales Scoring Assistant does not save test data or reports.

You may save raw data only. To do this, export the data into a comma-delimited ASCII text file for use in spreadsheet applications. To save the graphic image of the report, you can use the Windows copy and paste functions to place each page of the report in a word processing document. The document can be saved for later reference, but cannot be edited because each page is a graphic image.
