

# How do you select the FSIQ or PRI?

## Frequently Asked Question:

How do you select the FSIQ or PRI?

## Resolution:

With PsychCorpCenter open, navigate to the report wizard on the bottom right hand corner of the screen and select WISC-IV-WIAT-II Icon. This will open a candidate selection box in which you can select your candidate. Note: Both the WISC-IV and WIAT-II must be administered in order to receive an Ability Score Type.

The screenshot shows the 'WISC-IV Options' dialog box. On the left, under 'Tables and Graphs', there is a list of items with checkboxes. On the right, there are several sections: 'Subtest Comparison Group' with radio buttons for 'Overall Mean' and 'Verbal Comprehension and Perceptual Reasoning Means'; 'Source of Base Rate' with radio buttons for 'Overall Sample' and 'Ability Level'; 'Significance Levels' with radio buttons for 'Confidence Intervals' (95% and 90%), 'Subtest Discrepancies' (.05 and .15), 'Subtest vs. Mean of Subtest' (.05 and .15), 'Process Discrepancies' (.05 and .15), and 'Ability-Achievement Discrepancy' (.01 and .05); and 'Substitution of Subtest Scores' with checkboxes for 'Information', 'Picture Completion', 'Arithmetic', and 'Cancellation', each followed by a 'for' label and a dropdown menu. At the bottom, under 'Ability Score Type', there are radio buttons for 'VCI', 'PRI', 'FSIQ', and 'None'. A red arrow points to the 'FSIQ' radio button.
