

File oleaut32.dll is out of date

Error Description:

File oleaut32.dll is out of date

Resolution:

The message ""The file OLEAUT32.DLL is out of date, this program requires a newer version"" may occur if this file has been replaced by an older version. WAIS-III WMS-III WIAT-II Scoring Assistant uses a number of support files in the C:\Windows\System folder and some of these files have versions that are not compatible.

The setup program installs the proper versions of these files, but setup programs from other applications may overwrite these files with older versions. The solution to version conflicts is simply to reinstall WAIS-III WMS-III WIAT-II Scoring Assistant using the original setup program. If you still experience an error, please call technical support at 800-249-0659.
