

# Export Input Data Entry Only

To access the Data Export function for WIAT-III, select **Tools | Export | WIAT-III**.

Data may be exported for statistical manipulation. Instructions for exporting data are located in the PCC-II Help - Export topic. After data has been exported, use this Export Map topic to create column headers for WIAT-III.

This export map provides each data-type that is contained in the Export file when WIAT-III data is exported from PCC-II. To use this map, follow the step instructions below.

The screenshot shows a Windows-style dialog box titled "Export". Inside, there's a section "Select Export Options" with a toolbar containing "Export", "Cancel", and "Help" buttons. Below this, a text field shows the "Specify Export Path and File Name" as "C:\Documents and Settings\Elevated\My Documents\Export.txt". The "Export Options" section has three radio buttons: "Include Examinee Name" (checked), "Export Input Data Only", and "Export Input Data and Calculated Scores". To the right of these are dropdown menus for "Delimiter" (set to ", (Comma)"), "From" (set to "1/1/2008"), and "To" (set to "7/28/2009"). The "Norms Group" section at the bottom has two radio buttons: "Age Based" (checked) and "Grade Based".
