

The wizard was interrupted before CELF-4 could be installed

Error Description:

The wizard was interrupted before CELF-4 could be installed

Resolution:

Install problems with CELF-IV Report Writer with Scoring Assistant: Error, "The wizard was interrupted before CELF-IV could be installed."

If your system locks up while you see the message, "Please wait this might take a several minutes," your network might have a firewall or proxy in place that is preventing the installer from accessing the Web Key Delivery site. You can disconnect from the network and restart the install to bypass the issue.

If setup fails, please contact the Technical Support Center and request an authorization number to complete the installation. The authorization number is a dynamic number that requires the install be running at the time it is issued. Please call 800-249-0659 from the PC with the software CD-ROM disc and the jewel case with the serial number available.
