

# Backup and copy CVLT-C database files to new computer

Back up the database files from the first computer before installing to the second:

Before you uninstall CVLT-C SA, backup the database if the data will be needed later:

1. If you are running CVLT-C, exit the program.
2. Use Windows Explorer to locate {C:\ CVLT-C}. This is the default installation location.
3. Locate and highlight the database files; these files have the extension \*.MDB.
4. Click Edit, Copy.
5. Display the contents of the drive to which you want to copy the files.
6. Click Edit, Paste.

If you are reinstalling the software, delete the program folder before reinstalling. Use Windows Explorer or My Computer to delete the program folder {C:\CVLT-C}.
