FrmMain Displayclientwindow, error 13 error line 20 Description: Type Mismatch

Error Description:

Error 430 Error line 0 class does not support automation
FrmMain Displayclientwindow, error no 13 error line 20 Description: Type Mismatch
[install installation launch enter data]

Resolution:

These errors may indicate that the WAIS-III-Canadian Scoring Assistant did not install smoothly due to the presence of applications running in the background. Follow these steps to uninstall and reinstall the software:

Uninstall the program first. Follow these steps to uninstall the software.

- Click Start, Programs, select PsychCorpCenter and click Un-Install.
- Follow the onscreen instructions to complete uninstall.
- When finished, restart the system.

If you do not find Uninstall in the program group, use Control Panel, Add/Remove Programs to uninstall. If this choice does not work, please contact the Technical Support Center for an uninstall cleanup disk that will completely remove the program.

- Close down the system and reboot before continuing with the clean install.
- Reinstall the software and reboot the system before launching the program.
