

Create combined WAIS-III/WMS-III/WIAT II SA or WMS-III/WIAT II report

How To create combined WAIS-III/WMS-III/WIAT II SA or WMS-III/WIAT II report:

There is NO normative data to support discrepancy analysis among a WAIS-III, WMS-III and WIAT II or between a WMS-III and WIAT II; therefore, the report wizard will prohibit these scenarios from ever occurring. You CAN compare and do discrepancy analysis between a WAIS-III and WMS-III or a WAIS-III and WIAT-II.

Follow the steps below:

1. Ensure that there is a combination of comparable reports entered, as noted above.
2. From the report menu, select the appropriate report icon. The Report Wizard box will come up.
3. Click on the appropriate examinee. The examinee should now be highlighted.
4. Click to place a checkmark in the boxes for the desired assessment comparison and click Next.
5. Check the report options needed for WAIS-III and WIAT II or WAIS-III and WMS-III. You must make a selection for Ability Score Type to get the table for Ability-Memory Differences. The default is None. Select VIQ, PIQ, or FSIQ.
6. Click "Next" to confirm the report options.
7. Click "Preview" to view the report.

Additional Notes:

WAIS-III, WMS-III, and WIAT II are normed for the ages shown:

- WIAT II: 4 years through adults, including norms for college students
- WAIS-III: 16-89 years
- WMS-III: 16-89 years
