

TPCASProductExportItem: export, error number: 70 / error line: 20 description: permission denied

Error Description:

TPCASProductExportItem: export, error number: 70 / error line: 20 description: permission denied

TPCASProductExportItem: export, error number: -2147024863 / error line: 30 description: method '~' of object '~' failed

Resolution:

Steps to recreate the problem:

1. Click File > Export
2. Select any product with existing assessment to export
3. Open Excel and click Data > Get External Data > Import text file
4. Excel wizard opens. Do not proceed through screens, but leave open (as if you see the file, and realize something is wrong)
5. Go back to PsychCorpCenter and repeat same steps 1-3. If the name of export file is the same, then the error will be received.

Use a different name or a variation of the name when exporting. This is due to the file not being available to overwrite.
