

## **A student already exists with the same Name**

When entering a new student record, the user may see a message saying that the student already exists, but it will also ask if they wish to move that student record into their class. This means that the student record already exists at another school. If they choose yes, the student record and all historical assessments will be moved into their class. The exception is if the student they are trying to enter already has an assessment entered for the current test window. If so, the student cannot be moved until after the current test window closes or the data from the current test window will be lost and have to be re entered.
