

Cannot enter student results for another teacher

When user accounts are setup in SELP, the user is given or denied the right to enter student data for another teacher. There is a check box that must be filled to give this right to the user. The check box is labeled ""Check here if this user will enter student data for other users."" Refer to the district admin for help changing this in your user account if you do not have the right to enter student data for other users.
