

How do I edit data in report?

Frequently Asked Question:

How do I edit data in report?

Answer:

While looking at the report, select the Finish button in the bottom right corner of the screen and you will be presented with the option of editing the current reports data including the demographics. This allows editing the raw data and demographics, but not the report itself. Note: Since the SAWS-A program does not save data or reports, once you close the program you cannot go back at a later time to edit a report.

The SAWS A is no longer available for purchase. Support for this software will continue for computers that fall within the parameters of the system requirements. For a list of system requirements please see the article in this section titled "System Requirements"
