

Cannot save the Case Data.

Frequently Asked Question:

Cannot save the Case Data.

Answer:

SAWS-A is a Scoring Assistant only and was not designed to be a report writer. It does not include the option to save case data or reports. The WAIS-III-WMS-III Writer is a newer and more comprehensive software program with database options. The Writer offers the choice of Interpretive, Statistical, Client, and Clinical reports and the longer reports may be edited with standard Windows word processing software.

For current prices or to order the Writer, please contact The Psychological Corporation Customer Service department at email address customer.service1@pearson.com or fax at 800-232-1223.

The SAWS A is no longer available for purchase. Support for this software will continue for computers that fall within the parameters of the system requirements. For a list of system requirements please see the article in this section titled "System Requirements"
