

# GPF in Spool32

## Error Description:

GPF in Spool32

## Resolution:

If you are getting errors involving the Spool32, please make sure that you have the version 1.1 of the program. If you do, you might have a Special Printer Software Driver installed. Please disable that driver or install a generic windows 95 supplied print driver that will support your printer.

The SAWS A is no longer available for purchase. Support for this software will continue for computers that fall within the parameters of the system requirements. For a list of system requirements please see the article in this section titled "System Requirements"
