

List Memory (LM) and List Memory Delay (LMD) Age Ranges

Frequently Asked Question:

I cannot find any reference for the List Memory (LM) and List Memory Delay (LMD) between the ages 3-6 and 13-16

Answer:

No scores are shown because children in this age range should not have this subtest administered to them. Scores are listed in table A1 if the child is of the appropriate age for testing.

List Memory / List Memory Delay Testing

- See pages 74-76 in administration manual
- Start Point: Ages 7-12 for trial 1
- Ages 3-6 & 13-16 (do not administer)
