

What is the 2 inch black round flat disk for in the Bayley-III kit?

Frequently Asked Question:

What is the 2-inch black round flat disk for in the Bayley-III kit?

Answer:

After a thorough review of the materials needed for each item in the Bayley-III, it has been concluded that there is no use for the black disk. The two items that use disks (68 and 89 on the Cognitive Scale) do not use the black one. The black disk was used for an item that was dropped after standardization.
