

Is the cumulative sorting time the time it took to reach a discontinue criterion or the time it takes to the last attempted sort?

Frequently Asked Question:

Time-per-sort ratio: is the cumulative sorting time the time it took to reach a discontinue criterion, or the time it takes to the last attempted sort? For example, a person may complete his/her last sort at 132, but just sit and wait until they are told to stop at 240 seconds.

Answer:

It is the time to the last attempted sort, when they say they are done.
