

Under Visual Attention for Faces, the child was given 207 sec (went over by 27sec).

Frequently Asked Question:

Under Visual Attention for Faces, the child was given 207 sec (went over by 27sec). How do I score the rest of the subtest. Do I calculate the max sec of 180?

Answer:

If the child was given additional time, 180 can be used to calculate the score. However, given the fact that the child had additional time, the total score should be viewed with caution and interpreted with the additional time in mind.
