

Color Blind paragraph text does not display on the report

Frequently Asked Question:

Color Blind paragraph text does not display on the report

Answer:

If you have the Color Blind checkbox selected and are administering a Bracken SRA-3 Posttest for example, and you have not entered a raw score in either the Pretest or Posttest raw score fields, then the Color Blind paragraph text should print on the report. However, if you have entered (inadvertently or otherwise) a raw score in the Posttest Colors subtest, then the Color Blind paragraph text will not display on the report.
