CVLT-II Scoring Assistant Update.txt

This file contains information about the CVLT-II Scoring Assistant. For additional tips and information, read the online help after you have installed the CVLT-II Scoring Assistant.

CVLT-II Scoring Assistant
Update Version 1.0.2

The following issues were addressed in this update:

1. The graphs for the 'Alternate' and 'Short' form assessments show the correct 'Mean Correct +- 1 SD' range.
2. On the Research Report, the responses for 'Items Correct' in Trial B match the correct category.
3. "Time Since Test" on the 'Assessment Information' tab calculates the correct time interval.
4. The norm tables for the Alternate Form have been repaired.
5. When entering assessments with extreme (10+) multiple intrusions, "Load_CatsCombo (clsassessment): Invalid Property value Er: 380/Error L: 18" no longer appears.
