

Why can I not use the scroll down menu for 'Employment status' when we use a 5 to 21 years old form (parent or teacher)?

The Teacher Form (Ages 5-21) is a comprehensive, diagnostic measure of the adaptive skills that have primary relevance for children's functioning in a school setting, and can be completed by teachers or teacher's aides. The Teacher Form is used for children in grades K through 12 or ages 5-21 years (students still in school). The form extends through age 21 to include special education students and other students who continue to be served through a secondary school setting. The 'Employment status' is used on the Adult Form (Ages 16-89). The Adult Form is meant for young adults who no longer are participating in secondary school settings, but may be participating in community or work settings, job training programs, or post-secondary institutions.
