MS Word compatible word Processor is not installed

Error Description:

A Microsoft Office Word compatible word processor is required in order to view the generated report. If you do not have a compatible word processor to open '.doc', files, please close the application, insert the product CD and choose the ;Install Word Viewer" Option.

Resolution:

The PsychCorpCenter-II platform **requires** MS word or a variant of MS Word such as Word Viewer to be installed on the computer to generate a report. If MS word is not installed, you can insert the PCC-II install CD and install the Word viewer from the main CD menu. Once Word Viewer is installed, open your PCC-II application and run your report.

If the above mention solution dose not resolve the error please call Technical support at 1-800-249-0659.
