

Examinee age is out of range

Error Description:

Examinee age is out of range

Resolution:

ABAS-II Scoring Assistant can be used to scores examinees from ages 0 to 89 years old. There are specific Record Forms for each age and respondent group. These are:

1. Parent/Primary Caregiver (Ages 0-5)
2. Teacher/Daycare Provider (Ages 2-5)
3. Parent (Ages 5-21)
4. Teacher (Ages 5-21)
5. Adult-Self (Ages 16-89)
6. Adult- Other (Ages 16-89)

If you select the wrong Record From for the examinee age, you will receive a message similar to, ""Examinee age is out of range. The subtest scores cannot be accepted for this age range. Please verify the Examinee's Date of Birth/Test Date.""

The window may not close properly and requires a forced restart of the computer. Press the keyboard keys [Ctrl]+[Alt]+[Del] and click on Task Manager (or Task List). You will see ACenter at the top of the Applications list. Highlight ACenter and click End Task. You will need to restart PsychCorpCenter and ABAS-II to re-enter the Assessment data.
