

Can I benchmark with RCBM and progress monitor with Maze?

Technically, yes, the system will allow Benchmarking and Progress Monitoring for every measure available. Best practice would indicate that if concern exists regarding a student's performance/progress in R-CBM, then Progress Monitoring should be done in R-CBM. . If a student does not score well on R-CBM, then the research suggests they will likely not score well on MAZE; therefore, if a student does not score well on R-CBM best practice would indicate that Progress Monitoring with R-CBM is preferable due to it being a better measure of the student's General Reading Ability and more sensitive to change.
