

# Raw Scores 2 Window

The **Raw Scores 2** window opens when Raw Scores is selected from the Assessment window navigation tabs. The **Raw Scores 2** tab will appear at the top of the Raw Scores screen. Selecting the Raw Scores 2 tab will open the Raw Scores 2 screen. From this tab, raw scores for the WIAT-III assessment may be entered.

## Score Edit Boxes

The score fields are blank for new assessments. Existing assessment records are populated with any previously entered and saved values when in view/edit mode. If a score is entered that is out of range for the specific score, a red circle with an X will appear next to the text box. The score must be entered correctly before navigating to the next field.

Use the WIAT-III Administration and Scoring Manual to score subtest items and obtain the total raw score for each subtest. For Oral Reading Fluency, enter the responses for each item and the total raw scores will be calculated automatically. Blank is not a valid value for scoring purposes. A 0 or 1 should be entered to trigger a calculated score for uncompleted fields. If attempting to save data without filling in a required field, a red circle with an X will appear next to the field that needs data.

**NOTE:** For adults aged 20:00-50:11, raw score entry fields will default to the same subtests that are available for grade level 12.

The screenshot shows the 'WIAT-III Assessment for SAMPLE, JANE A' window. The interface includes a title bar with 'WIAT-III Assessment' and a window control icon. Below the title bar are buttons for 'Save and Close', 'Cancel and Close', and 'Help'. The main content area is divided into three vertical tabs: 'Raw Scores 1', 'Raw Scores 2' (which is selected), and 'Raw Scores 3'. On the left side, there is a vertical navigation pane with three sections: 'Administrative Information', 'Raw Scores' (which is highlighted), and 'Skills Analysis'. The 'Raw Scores' section contains several subtests, each with a text input field and a label indicating the total raw score range. The subtests and their ranges are: Pseudoword Decoding (0 to 52), Pseudoword Decoding Speed (0 to 52), Numerical Operations (0 to 61), Oral Expression (Expressive Vocabulary: 0 to 17, Oral Word Fluency: 0 to 999, Sentence Repetition: 0 to 30), Oral Reading Fluency (with an 'Item Set' dropdown menu and fields for Completion Time, Addition Errors, and Other Errors for both Passage 1 and Passage 2), Spelling (0 to 63), Math Fluency - Addition (0 to 48), Math Fluency - Subtraction (0 to 48), and Math Fluency - Multiplication (0 to 40). At the bottom of the Oral Reading Fluency section, there are three calculated total raw score fields: Fluency Total Raw Score, Accuracy Total Raw Score, and Rate Total Raw Score.
