

MBMD Bariatric Report missing information

Error Description:

The customer reports that they generated a MBMD Bariatric Interpretive Report in Q Local 2.6.2 and some of the information is missing. This is evident by there being Bulleted points with no information behind the bullets or empty categories. The test is complete and does not come up as invalid but is still missing information.

Resolution:

2.6.3 is now available but only as a System Update download. Have them open Q Local, click on "System Updates" and download the 2.6.3 version. This corrects this issue.
