

# What if my school has not implemented Pearson Curriculum? Will AIMSweb measure the success of any curriculum program?

AIMSweb will always be **curriculum-independent** (i.e., useful regardless of a curriculum a district is using) and is designed to measure and monitor the effects of any instructional program, including intervention, teaching strategy, core curriculum, etc. The new instructional recommendation reports are available as an added value to customers that currently (or choose to) use Pearson curriculum products.

**Note:** the new Math Class-at-a-Glance report does not include references to any specific curriculum, but will enable teachers to directly link to an individual student instructional planning report for further instructional recommendations.
