

Can I score an assessment for an adult using grade-based norms?

Grade-based norms are not available for examinees above the age of 19:11.

When running a Clinician Report, norms data is selected automatically and set to Age if the examinee age is greater than 19:11. If the examinee is between the ages of 4:00 to 19:11, then the option to select Grade or Age Based Norms data is available for selection.
