

How do you back up your data on Qinteractive?

Frequently Asked Question:

How do you back up your data on Qinteractive?

Answer:

Q-interactive data is uploaded from the iPad to our application server over a secure connection. There, it is stored in an encrypted database. The data can be retrieved and uploaded from any location 24/7. There is no need to locally back up data because it is done automatically when the iPad is synched.
