

## WAIS®–IV<sup>CDN</sup> Report Writer Read Me

### Version 1.0.2

This file includes helpful information about the WAIS®–IV<sup>CDN</sup> Report Writer. The 1.0.2 update includes the following fixes:

---

CR 37265	Corrected issue seen when selecting a WAIS-IV index for substitution (i.e., only two of the four WAIS–IV indexes may have a subtest substituted within the index or the index prorated due to a missing subtest (for VCI and PRI only)).
CR 37223	Corrected issue calculating Digit Span Total Raw Score when all process scores are not entered (i.e., Digit Span Backward, Digit Span Sequencing, and Digit Span Forward are all required to calculate composite.)
CR 35933	Corrected issue when entering an apostrophe in the comments section of the WIAT-II assessment window when running a combined WAIS–IV—WIAT–II report.
CR 36202	Corrected issue when attempting to generate a WAIS–IV—WMS–IV combination report.

---

For additional information about your Report Writer, please refer to the application's online help or contact the Pearson Technical Support Center at (800) 249-0659 Monday through Friday, 7AM – 6PM CST.
