

## Advanced Clinical Solutions for WAIS®-IV and WMS®-IV

### Version 2.0.1

This file includes helpful information about the Advanced Clinical Solutions for WAIS®-IV and WMS®-IV. The 2.0.1 update includes the following fixes:

---

CR 37845	Corrected issue in the WMS-IV Full Demographic Adjusted Score Summary which involves the Older Adult Battery and the Full Battery of WMS-IV overlapping the 64-69 age range and the impact this has when performing demographic adjustments. Updated software to use the battery which was selected in the assessment screen in order to calculate demographic adjustments.
CR 37786	Updated software to include specific options related to <b>Region, Race/Ethnicity, and Highest Years of Education</b> in the Test of Premorbid Functioning (TOPF) and Demographically Adjusted Norms reports for international users. Users who have a regional setting set to English (Australia), English (Canada), English (Ireland), English (New Zealand), English (United Kingdom), or French (Canada) will see these changes.

---

For additional information about your Scoring Assistant and Report Writer, please refer to the application's online help or contact the Pearson Technical Support Center at (800) 249-0659 Monday through Friday, 7AM – 6PM CST.
