

Wechsler Memory Scale®–Fourth Edition (WMS®–IV) WMS®–IV Report Writer

Update Version 2.0.2
Changelog
1/10/2012

This file includes helpful information about the WMS®–IV Report Writer. The 2.0.2 update includes the following changes:

Interpretive Report Combo (WAIS-IV—WMS-IV) [39680]

While using the predicted-difference method, the software will use the WMS-IV index score that is predicted from the chosen ability score for the discrepancy comparison (used in interpretive text) rather than comparing the ability score directly to the WMS-IV index score

For additional information about your Report Writer software, please refer to the application's online help or contact the Pearson Technical Support Center at (800) 249-0659 Monday through Friday, 7AM – 6PM CST.
