

Client Report printout shows in one column only on multiple pages

Frequently Asked Question:

Client Report printout shows in one column only on multiple pages

Answer:

The 40.000 Selected Words software lets you print reports for the Therapist or Client. By design, the report prints in a single column.

If you export the Therapist Report as TEXT (i.e. ASCII), you will have to use a text editor to reformat the text using the Psychological Corporation font, or phonetic characters will not display correctly. Since the TEXT file is exported as mono-spaced text, and the Psychological Corporation font is a proportionally spaced font, the text will not be aligned correctly.
