

Hand scores do not match test results

Frequently Asked Question:

Hand scores do not match test results

Answer:

This issue has been resolved in CVLT-II Service Update Version 1.0.2. The following issues were addressed in the update:

- The graphs for the 'Alternate' and 'Short' form assessments show the correct 'Mean Correct +/- 1 SD' range.
- On the Research Report, the responses for 'Items Correct' in Trial B match the correct category.
- "Time Since Test" on the 'Assessment Information' tab calculates the correct time interval.
- The norm tables for the Alternate Form have been repaired.
- When entering assessments with extreme (10+) multiple intrusions, "Load_CatsCombo (clsassessment): Invalid Property value Er: 380/Error L: 18" no longer appears.
